

Fact Sheet

Trolley For Rotary Die Handling

Manoeuvrability and safety

This new trolley is made from our new UNI Profile and as a result, very light weight, and easily moved by hand. The Trolley is very safe to move as no hard pushing is required.

Stability on any surface

The trolley is very stable due to large rubber wheels. Two of these wheels have brakes for safe parking.

Maintenance

The trolley is maintenance free as the new UNI Profiles are anodized and very easy to keep clean.

Custom made

The trolley can be custom made, to suit almost any size of rotary die. Delivery time is quite short, as all components are in stock.
